SELLING POINTS

● Custom Isuzu 4HK1 Engine

Engine power is 133kW/2000rpm, more powerful, DLC coated injector and SUS316 material EGR valve rod have better adaptability for inferior fuel.

● Longer Undercarriage

With 3.446m track length on ground which increased by 3%, the stability is improved.

● Filtration performance improvement

Adopt mine-level filtration system, three layers of coarse filtration, improve the precision of fine filtration, "large multi-stage filtration system" makes better fuel adaptability.

● Automotive Intelligent Cab

The performance of new cab has been greatly improved in intelligence, comfort, reliability, and other aspects, which provide the operator have a better driving experience.
